

## CREATE SHINING EFFECTS - WITH THE NEW FOLACOAT HIGH GLOSS COATING PLATE

### FOLACOAT HIGH GLOSS

The Folacoat High Gloss coating plate is a premium product from the Folex coating plate range and was developed specifically for the field of high-gloss UV coating.

The product is particularly attractive for printers in the commercial and packaging printing segment, who impose high demands on their print products and would like to achieve high-gloss effects in UV coating.

Needless to say, the polymer of this product is once again guarded by a protective film. The slipping film permits convenient manual cutting. Folacoat High Gloss has a soft top polymer layer with outstanding surface properties for excellent UV coating transfer.

The coating plate can be stripped quickly and easily, guaranteeing a long service life at the same time.

With Folacoat High Gloss, you can achieve real highlights in UV coating and are ensured uniform coating transfer.

### ADVANTAGES OF FOLACOAT HG 1.15 MM AND 1.35 MM

- High gloss effect
- Very good register maintenance, even for long runs
- Can be used for dispersion and UV coatings
- The soft top polymer layer results in smooth, homogeneous coating application
