

FOLEX HIGH SPEED LABEL RANGE CONTINUES TO EXPAND AT LABEL EXPO 2019

24 - 27 September 2019 / stand 9C12

Folex uses the label industries leading global exhibition to introduce an ever expanding portfolio of synthetic films for the label industry in Brussels on September 24th – 27th 2019. The label industries latest printing innovation using high speed ink jet, HP Indigo & colour laser technology is opening up the world of label printing to a much wider customer base, which is creating exciting new opportunities for creative label designs, customisation and personalisation.

On show Folex will be demonstrating its know-how and expertise as a leading specialist manufacturer of coated face films for adhesive manufacturers as well finished adhesive label product options using permanent & removable adhesives.

The portfolio includes latest generation glossy nano technology, perfectly matched for high speed printing. The highly glossy surface offers super fast ink absorption to easily cope with the fast printing speeds typically used by memjet label printers. Unique and new at this years show will be Polyethylene PE face films using this ink jet nano glossy coating. PE has the benefit of low stiffness and good squeezability. Previously PE was only available for traditional flexo printing but now additionally ink jet. The range of glossy PP films in addition grows with new thinner base options which complements the existing matt microporous version which is also in the line-up.

As well as the ink jet range, a portfolio coated for HP Indigo & a range for colour laser toner is also available including clear, glossy & matt white as well as silver & gold adhesive films. All are pre-treated, heat stabilised for great ink / toner adhesion & high flatness control & providing perfect runnability through all latest generation digital presses, with no limited shelf printing life.

Please come & join Folex on stand 9C12 to see the latest complete portfolio of face films and finished adhesive materials suitable for label printing.

Folex looks forward to welcoming you to the booth.
