

ICE EUROPE 2019 - PREVIEW

Munich, 12.-14.03.2019, hall A6, booth 574

FOLEX – FLEXIBILITY AND EXPERTISE IN COATING AND CONVERTING

Schwyz, 22.01.2019 - Increasingly, companies no longer have the personnel, technical or financial resources to provide their products with sophisticated coatings or to convert their products into dimensionally accurate rolls or formats.

As a specialist in the coating and converting of films and similar web-like substrates, the Folex Group offers R & D services, processing of aqueous, solvent-based and UV-reactive formulations, scratch-resistant coatings, thermo-stabilization, lamination & converting etc. All this also under cleanroom conditions.

Thanks to many years of experience and a strong ability to innovate, Folex offers tailor-made, high-quality product solutions for substrates of 0.005 - 2.00 mm and coating layer thicknesses of 0.1 - 80 my on both sides.

Folex has earned an excellent international reputation. Especially in contract coating, Folex customers can profit from our extensive know-how.

We are looking forward to welcoming you to our booth 574, hall A6 and introduce suitable solutions.

ABOUT FOLEX

The Folex group, with three production companies in Switzerland (Schwyz) and in Germany (Cologne and Erlangen), specializes in the refinement and coating of films and special media, offering high-quality products and individual services for a wide variety of markets. The Folex product world encompasses solutions for many industries - from the printing industry to digital and large-format printing, the office and home sector and pre-products for the electronics industry.

More information on our complete portfolio is available at www.folex.com.
